

Application No. 10/042,358

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

Claims 1 through 7 (Canceled)

8. (Currently Amended) ~~A device in accordance with claim~~

1 An electronic device containing a regioregular polythiophene

(I)

wherein R represents a side chain, m represents the number of R substituents; A is a divalent linkage; x, y and z represent, respectively, the number of R_m substituted thienylenes, unsubstituted thienylenes, and divalent linkages A in the monomer segment subject to z being 0 or 1, and n represents the number of repeating monomer segments in the polymer or the degree of polymerization; and wherein the side chain R is a siloxyalkyl or trimethylsiloxyalkyl, or triethylsiloxyalkyl, and wherein the alkyl portion optionally contains from about 4 to about 10 carbon atoms, and which alkyl is butyl, pentyl, hexyl, heptyl, or octyl.

Claims 9 through 35 (Canceled)

DO NOT ENTER 9/2/03 ER

Application No. 10/042,358

36. **(Currently Amended)** An electronic device containing a regioregular polythiophene

(I)

wherein R is alkyl, a siloxyalkyl or trimethylsiloxyalkyl or triethylsiloxyalkyl, m represents the number of R substituents; A is a divalent linkage; x, y and z represent, respectively, the number of R_m substituted thiénylenes, unsubstituted thiénylenes, and divalent linkages A in the monomer segment subject to z being 0 or 1, and n represents the number of repeating monomer segments in the polymer or the degree of polymerization.

37. **(Previously Presented)** A device in accordance with **claim 36** wherein said alkyl contains from about 4 to about 10 carbon atoms.

38. **(Previously Presented)** A device in accordance with **claim 37** wherein alkyl is butyl, pentyl, hexyl, heptyl or octyl.
